

Dr. Amita Sachdev N.D. is Moving!

My Dear Valued Patients,

As I continue to grow into 25 years in health care, first as a Registered Nurse, and practicing as a Naturopathic Doctor for over 15 years, this year especially has been an exciting time for growth and expanding my services.

Many of you have seen me over the years for family health and cancer support. I will continue to provide for you and your family & friends the same great care in my new location at the Integrated Medical Clinic (IMC) inside **Smith's Pharmacy** at Rutherford and Hwy 400 in Vaughan and at **Khalili Zambri & Associates Naturopathic Healthcare** at Sheppard and Leslie (off the 401) in North York, starting in July. Details below.

Patients can look forward to bright, new, and larger facilities with expanded services including IntraVenous Infusion Therapy (IVIT), inhalation treatments, injectables, bioidentical hormone prescribing, thyroid hormone prescribing, fertility support, cancer care, laboratory testing, live blood cell analysis, allergy testing, heavy metal testing, tax benefit on prescriptions dispensed by our pharmacists, and so much more, including electronic medical records & online booking.

Patients can also look forward to more available appointment days and times, including some Saturdays - to accommodate your busy schedules I will also continue to provide home visits to patients in need and may email or text directly and personally to access flexible home care.

If you're unsure where to see me, call or text me directly. I can help you.

3590 Rutherford Rd., Unit # 3

Vaughan, Ont. L4H 3T8

Clinic Phone: (905) 553-1294

Tues & Thurs: 9am – 4pm

This Season's Feature is: **IntraVenous (IV) Therapy**

Intravenous (IV) Therapy (or Naturopathic Infusion Therapy) refers to the use of high dose, pharmaceutically compounded vitamins, minerals, homeopathic remedies, and botanicals given to patients through a needle directly into their blood circulation.

This is a relatively safe way to achieve the concentration levels necessary to achieve therapeutic benefit.

Intravenous Infusion Therapy can also be used for Cancer support, Heavy Metal Toxicity, Digestive disorder, Immune support, Weight management, Anti-aging, and more.

**Call to book your
consultation**

(Real food is not used in IV therapy)
