July 2012

I'm Moving and Expanding my Services!

This year has been an exciting time for growth and expanding my services. Many of you have seen me over the years for family health and I will continue to provide you and your family & friends the same great care in my new locations in Kleinburg and Bolton.

Additionally, patients can look forward to expanded services such as IntraVenous (IV) Therapy, also known as, Naturopathic Infusion Therapy. One of the most widely used formulas is the Meyer's Cocktail, which is a combination of vitamins and minerals used to treat a variety of conditions.

These individually formulated and specially prepared substances, administered directly into the blood, by-pass the digestive system and can achieve concentrations not possible through oral supplementation.

Many patients report improved energy and improved normal immune function. Some of the uses of Naturopathic Infusion therapy include but are not limited to:

- Alzheimer's and Dementia
- Asthma / Allergies / Lung disorders
- Auto-immune disorders
- Cardiovascular disease
- Fatigue / Fibromyalgia / Chronic Fatigue
- Migraines
- Narcotic Withdrawal

This Season's Feature is: **"IntraVenous (IV)** **Therapy"**

Intravenous (IV) Therapy (or Naturopathic Infusion Therapy) refers to the use of high dose, pharmaceutically compounded vitamins, minerals, homeopathic remedies, and botanicals given to patients through a needle directly into their blood circulation.

This is a relatively safe way to achieve the concentration levels necessary to achieve therapeutic benefit.

*Naturopathic Infusion Therapy can also be used to treat **Cancer**, Heavy Metal Toxicity, Pain Control, Hyperthyroidism, Anti-aging, and more.*

*Call to book your
Naturopathic Infusion
Therapy
(Real food is not used in IV therapy)*
